8. Updating software	22

1. The headset appearance

2. Basic controls

There is a status bar on the top left corner and a control bar on the top right corner.

Status bar:

- 1 Status of connection to SecureTest server (online green / offline red). Click on red circle (server is offline) to reconnect to the server (1).
- 2 Status of connection to the Internet (online green / offline red) (2).
- 3 Wifi status: signal level (online green / offline gray), network name. Click on signal level to open Wifi configuration (3).

Control bar:

Clicking on the button shows an information screen. Here you can see some headset`s software options (4).

2 Clicking on the button shows shutdown options. Here the student can reboot or shutdown the headset. If the student is already authorized he/she can logout (5).

3 Clicking on the button shows headset settings (6). Here the student can:

View the temperature of the headset CPU.

Change the scale of the interface on the headset.

Change LED mode (turn on/off).

Settings	Temperature: 53`C
Scale	🕕 0.75 😑
Demo mode	
LEDs always ON	
	Ok

3. Turning on the headset

After the connecting of power supply you would see the loading screen with the logo.

3.1. Connecting the mouse

After the turning on you need to connect your mouse:

If you already connected this mouse to this headset you will need only to turn on the mouse.

Monitor ID: 100000001 Mouse MAC-address: 98:FD:B4:A5:5BE5 Mouse is paired, but not turned on Please, turn on the mouse Waiting for connection: 01:07

After the mouse connection the headset would check the internet connection.

If the headset restores connection to the wifi network you can go to the User registration/authorization section. Otherwise, follow the Wifi connection section.

4. Wifi connection

After the first wifi connection, the headset will remember the connected network, so the student doesn't need to connect every time.

4.1. Connect to new wifi network

Start screen: Wifi configuration.

SecureTest [™] ● Interr	net 🌒 🗢	(i)	U Settings	
SSID			Res	scan
SEDNEV			> Forget	network

a s	d f	g h j	k l	←
企 z x	c	v b n	m ! ?	企
?123 /		English	.com .	?123

- 1 Select SSID from the drop down menu.
- 2 If there is no desirable wi-fi network you can try to rescan available wi-fi networks (using button "Rescan").
- 3 Enter a password for selected network.
- 4 Click "Connect".

4.2. Other wifi options:

- "Forget network" remove wifi network from the drop down menu.
- 2 "Disconnect" disconnect from the active wifi network.

After the successful connection "Welcome" screen would be visible.

Welcome!
Press OK to start using your Monitor
OK Preview

5. User registration/authorization

5.1. Check headset location

Start screen: Welcome

Click "Preview".

Welcome!
Press OK to start using your Monitor
OK ● Preview

Click "Ok".

3 You should see your both eyes. Adjust your headset so both your eyes would be in green frame.

5.2. Register new iris code using PC

Start screen: Welcome.

Click "Ok".

Welcome!					
Press OK to start using your Monitor					
OK Preview					

2 You should look at the yellow eye-icon. After the authorization failed you would see the question.

4 Click "With PC".

Screen would change. Follow the instructions.

5.4. Authorization

Start screen: Welcome.

SecureTest [™] ● Inte	rnet 🌒 奈	í	Ċ	Settings	
	Wel	come!			
	Press OK to start	t using your N	lonito	r	
	ОК	• Preview			

- 1 Repeat step 1, 2 "Register new iris with PC".
- 2 If you authorized successfully you would see your Home page.

3

If your authorization failed:

- If you are registered go to preview mode ("Check headset location"), check your headset and authorize one more time.
- If you are not registered follow "Register new iris with PC" or "Register new iris without PC".

6. Taking an exam

After the successful authorization you can see your name and university id at the top right corner.

Start screen: Home page.

SecureTest™ ●	Internet 🔍	Ŷ		(i) (J) Setting	IS
Home				Baker, Gragory	y D. UID BG0234
	Watch	O lectures	or	☑ Take Exam	

- 1 Click "Take exam". You should see the exam list.
 - Click "Home" to return to previous screen.
- 2 Choose desired exam.

3

Click "Take exam". You would see the description of the exam.

() 1h 05m	HTML document structure . JavaScript (Professor Navrotsky	′ V.)			Unviewed
th 14m	Introduction to JavaScript JavaScript (Professor Navrotsky	v V.)			Unviewed

2 On this screen:

- Click (1) to download lecture.
- While the lecture is downloading you will see progress icon (3).
- After the download completion you will see play icon (2).
 - All new lectures would have status "Unviewed". It will change to "Viewed" after watching the whole lecture.
- 3 Choose the desired lecture by clicking on play button (2). You would see the lecture information screen.
- 4 Click "Watch lectures" to start watching lecture. You would see the lecture.

Click (1) to resume watching.

Click (2) to pause watching.

To return to previous screen click (3).

8. Updating software

The headset has automatic updates. After turning on and connecting to the SecureTest server the headset will ask to update software.

To update click "Yes".

If you click "No" the headset would ask to update at the next turning on.

After update confirmation updating will start.

After the update the headset must be rebooted.
